 - D : 350 BEF
- Wholesale Prices on demand.

All MICRART bands participate in any compilation project.
Send us your invitations, and we'll send you our music !

Here You find some background information concerning the bands represented by Micrart Group vzw. They are all independant Belgian bands, which we have brought together. Micrart Group vzw is therefore helping them to participate in any compilation project or music release and to spread news. Here we go:

Unovidual: Creates 'home-composer' - electronic music of any kind. Works solo and in co-operation through mailing (mailmusic).

Twilight Ritual: Concept music, based on experiment, powerfull rhythms and sequencer, voices and functional use of electronics. Home-recorded live composition, using tapes. Pictural sound.

Linear Movement: Melodic and popular rithm music for dance and easy listening. Steady.

Autumn: Electronic music from melodies and theme-music to sound expressions and visual impressions. Fragile.

Syndrome: All kinds of electronic synthesis and environmental expression. Each product is it's own concept.

A Split Second: The heavy rithmic wave sound which makes you move anyhow. Some minimal and some maximal. Straight.

We wait for your participation invitation !
Thank !
